

## Results

The **Results** tab displays all diagnostic results by department (i.e. Lab, Rad, Trans, and Path) depending on what is within the patient's record.

It also provides a variety of options to view information:

- **Showing** – Provides the ability to display **All** results, or filter by **Inpatient**, **Outpatient** or **ER**
- **Date Range** - Results can be filtered by date range, **months**, **year** or **All Records**
- **Filtering** - Limit the **Status** and/or **Type** of the results you wish to display - Click on the radio buttons to include or exclude values from the filter
- **Status** – Allows the user to filter results by: **All**, **Completed**, **Corrected**, **Final** or **Preliminary**
- **Type** – If data is available, filter by **Type** of result: **All**, **Lab**, **Rad**, **Trans** or **Path**
- **Search Text (or Quick Search)** – Allows the user to search for specific results or narrow down the information displayed
- **Sorting** - Clicking the header will sort the patients by descending order - All header columns have the same functionality - In each title field there is an arrow indicating directions: an arrow facing up indicates data is sorted in an ascending order, and the arrow facing down indicates a descending order
- **Viewing**- Select a specific result to display further details or to print the result if needed
- **Abnormal results** - Shown in **red** under the **Alerts** column

**Results** Showing **All** Inpatient Outpatient ER **All Records**

Additional Records May Be Available - Additional Rights

**Filter Results**

**Status**  
 All  Completed  Corrected  Final  Preliminary

**Type**  
 All  Lab  Rad  Trans  Path
